WP Posting for Profit Plugin Guide

[If you need your own website or blog click here for 4 sites with live and video trainings plus affiliate commissions for less than ten dollars per month](#) or see the following 5 steps and start adding your money making links to all your posts.

Step 1 - Click on the WP Posting for Profit Gear in the left hand column of the dashboard and the user input section will open. The code has been setup and centered so that all you need to do is place the link for your auto-responder, banner, video or additional information between the beginning and ending code markers and **Save Changes**.

Step 2 – You can change the code to right or left if you wish just remember to change both the beginning <right> and the ending </right> parts of the code and **Save Changes**.

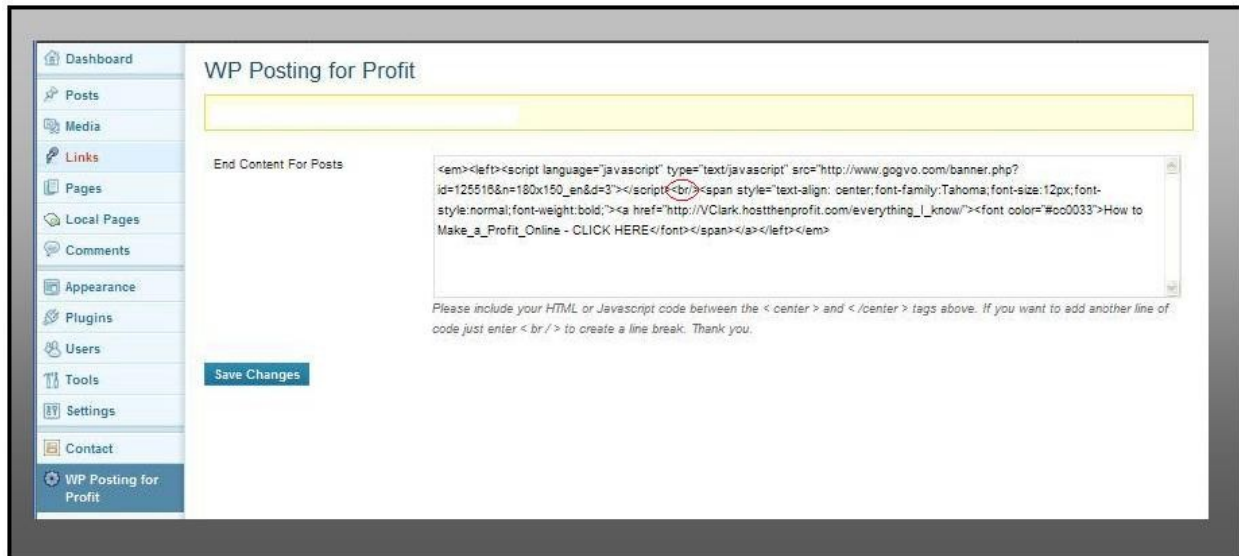

Step 3 – Pull up one of your posts in a browser window to verify that your coding is correct.

The screenshot shows a Facebook post with the following content:

- Commissions To Help You**
- start making a profit today...**
- Mike Filsaime says:**
- A video testimonial from Mike Filsaime, titled "Mike Filsaime" and subtitled "Most Followed Internet Marketer In The World". The video content includes: "I have been a client of QVC for the past 5 years. They provide Top Notch product and services. I would NOT trust my business with any other Data Center! I am excited to be part of this and don't want YOU to miss out on this opportunity!" - Mike Filsaime
- Text below the video: "CHECK everything out for just 1 dollar and then this whole package is ONLY \$9.97 per month!!! ~ [CLICK HERE](#) to see all the information."
- Text below that: "After Save changes look at one of your posts to see your form or other information."
- Facebook interaction elements: "Like" button and "Be the first of your friends to like this."
- A red-bordered registration form with fields for "Full Name:" and "Email:" and a "Submit" button.

[If you have additional questions about html code, affiliate banners, auto-responders or how to make money please click here.](#)

Step 4 – You can add more than one item to all your posts. It is easy to change the information on all your posts for a sale or even a news flash. Too many items may distract from your post but when you wish to add another link just place **
** at the end of the first item put in the next link and either add another **
** which equals break and another link or just make sure the ending code is in place and click on **Save Changes**.

Some suggestions are add a banner, a video and affiliate link but it is up to you and you can add and change these items as often as necessary. No matter which post a visitor clicks on now they will see your promotions!

Step 5 – After any changes view one of your posts online and double check the information.
